

INTEGRATED
PAIN MANAGEMENT

If You Suffer From Pain You Are Not Alone.

Assessment | Treatment | Management

Integrated Pain Management provides a new, innovative approach to the assessment, treatment and management of pain. We are proud to collaborate with leading Pain Specialists in the provision of pain assessment and offer in-depth consultation services, high quality diagnostic imaging and image-guided pain management treatments. During our image-guided procedures, our highly trained Radiologists use image-guidance to deliver medication directly to source of the pain. Image-guided pain management procedures are particularly effective if you are experiencing spinal pain, neck and back pain, persistent joint pain, soft tissue inflammation and pain in other areas.

Pain Specialists

At our clinic at Maroochydore, you will be able to access pain assessment services with leading Pain Specialists on the Sunshine Coast. After your consultation, you may be recommended for diagnostic imaging and image guided procedures.

Image Guidance

During our Image Guided Pain Management procedures our highly trained Radiologists use image guidance to inject a fine needle into the affected area. Medications are delivered directly to the source of the pain in this way, and thus are usually much more effective.

Faster Pain Relief

Pain may be alleviated faster than other traditional methods. Usually you can expect to feel relief within days, with the full effect occurring in a few weeks. Local anaesthetic may also give temporary relief. Treatments may be used to diagnose, treat or deliver pain relief.

Benefits Over Surgery

Image-guided pain management treatments may delay or eliminate surgical intervention. This provides additional benefits as there are no large incisions to heal and infection rates are significantly lower than with open surgery. It may be a beneficial alternative.

Do I Need a Referral?

Yes. After receiving a referral from your GP you will be booked in by staff and asked a series of questions. We may also need to see your previous imaging. You can contact our friendly staff on 5430 3955.

Image-Guided Pain Management

Am I a candidate for treatment?

You may benefit from our pain management consultation and procedures if you have found only limited relief from typical treatments. We recommend seeing your Doctor for a referral for consultation and treatment at Integrated Pain Management when:

1. You have tried a number of alternatives to relieve your pain without success.
2. Have inflammatory pain, such as joint pain or muscular pain.
3. You have found only limited relief from physiotherapy, massage or other methods.
4. Are currently on a waiting list for surgical procedures, such as a knee or hip replacement.
5. Have pain that does not seem to subside and would like a consultation.
