CTCA

Calcium Score

Medicare rebate eligibility for CTCA

A Medical specialist may refer a patient for a CTCA with one of the following indications

The patient has stable symptoms consistent with coronary ischaemia, is at low to intermediate risk of coronary artery disease and would have been considered for coronary angiography.

The patient required exclusion of coronary artery anomaly or fistula.

The patient will be undergoing noncoronary cardiac surgery.

Please note that GP referred examinations for CTCA are not covered under medicare and hence incur a higher out of pocket cost. Alternatively a GP may request a cardiology consult first. If the below box is ticked an experienced cardiologist will review the patient and if they deem this is the appropriate test, they will refer the patient on for a CTCA.

I request a cardiology consultation for this patient
