NOTES

EXAMINATION — Please select a CT option with a tick. This is a Medicare requirement.

- ☐ **PET with Diagnostic CT**
• includes Head, Neck, Chest, Abdo, Pelvis + Thighs, unless otherwise stated
• performed **with** or **without** contrast (as per renal function and allergy status)
- ☐ **PET without Diagnostic CT**
• includes localisation CT only, Vertex to Thigh
• CT images are not acquired or interpreted to diagnostic standards. No CT report provided.

INDICATIONS FOR MEDICARE ELIGIBLE PET (Rebates only apply when referred by a **Specialist**. Other indications do not attract a Medicare rebate)

bookings@scradiology.com.au

scradiology.com.au/booking

Please send through your referral prior to making an appointment

② Your appointment

Date: _____

Preparation: _____

Appointment time: _____

Please arrive 15 minutes prior to your appointment time

For preparation instructions please refer to scradiology.com.au

③ What's important?

On the Day of your Scan

Please allow 2-2.5 hours for your appointment.

When you arrive, you will be asked to change into a gown and asked about your medical history. A small plastic needle will be placed into a vein in your arm or hand. Depending on the type of scan, your blood sugar will be measured.

You will then receive an injection of a small amount of radioactive tracer. Depending on your examination, you will be required to rest quietly for 45-60 minutes in your own room in a comfortable recliner chair. You will not be able to have a family member or friend remain with you; staff will be present to monitor your needs.

After emptying your bladder, you will be asked to lie still on a scanning table for 15-30 mins. Upon completion, you will be asked to remain in the department for 15 minutes. You may then leave.

During your exam you may be given contrast for the CT scan. Please inform us if you have an allergy or are pregnant or breastfeeding.

If you require sedation for your scan (claustrophobia), you will not be able to drive for 12 hours.

Scan Preparation

FDG Scan

- ☐ Fast 6 hours prior to your appointment. No food, chewing gum, lollies or vitamins. (Diabetic patient's see additional instructions). Drink as much plain water as you like and use the toilet as needed. No strenuous exercise for at least 12 hours prior to appointment. Please remove metallic jewellery prior to your appointment. If you have non-diabetic medications, take them at your usual times with plain water.

Diabetic Patients for FDG Scan

- ☐ **Non-Insulin Dependant**
If your appointment is before 12pm (noon), fast from midnight and DO NOT have breakfast or your oral diabetic medication. If your appointment is after 12pm (noon), have your normal breakfast with your oral diabetic medication, and then fast for 6 hours until your appointment.
- ☐ **Insulin Dependant**
Your appointment should be mid-morning. Eat a normal breakfast along with your normal insulin dose. Then fast for 4 hours prior to your appointment. You cannot take insulin for 4 hours before your appointment. Contact us on 07 5455 8955 if you are concerned about your blood sugar levels on the day or if you have an insulin pump. Bring your insulin and some food with you on the day.
- ☐ **PSMA Scan**
Fast 4 hours prior to your appointment. Drink 1 litre of water, 1 hour prior to your appointment and use the toilet as needed. If you have medications, take them at your usual times with plain water.
